Erasmus Ka210 "Having Fun in Learning- Gamification"

Teacher Sirelin Koval

Tartu Herbert Masingu Kool, coordinator of the project

As our extensive and engaging gamified journey concludes, we reflect upon the invaluable support and cooperation received from our esteemed partners in The Netherlands, Romania, and Hungary. The collaborative efforts with these partners have not only been accommodating but also immensely enriching, contributing to an overall exceptional experience.

The widespread adoption of gamification tools in both our professional and personal spheres has been notable, marking a significant upward trend. Our collective venture within the educational sector has been particularly enlightening, revealing diverse approaches to a common theme among our schools. This diversity underscored the inclusiveness within our collaborative network, demonstrating the various ways in which educational goals can be achieved.

Throughout our collaborative efforts, participating teachers consistently demonstrated creativity and innovation. By pooling our intellectual resources, we have curated a comprehensive collection of lesson plans that showcase the diversity of thought and methodologies. This compilation serves as a practical and valuable resource for educators across various fields.

Our hope is that these lesson plans, previously employed successfully in our own classrooms, prove to be equally beneficial for educators beyond our collaborative network. May this collection inspire and assist teachers worldwide in delivering engaging and effective lessons to their students.

Holidays at

Centrul Școlar de Educație Incluzivă "Orizont" Oradea -mobility within the "Having Fun in Learning- Gamification" KA210 Eramsus project

Teacher Cărădan Adina Centrul Scolar de Educație Incluzivă "Orizont" Oradea

Centrul Școlar de Educație Incluzivă "Orizont" Oradea celebrated, together with its partners within the Erasmus+ project KA210 "Having Fun In Learning - Gamification", identification number 2022-1-EE01-KA210-SCH-000081117, week 10-14 October 2023 - ErasmusDays#, by carrying out mobility in Oradea.

The partners, special schools from Estonia, Hungary and the Netherlands: Mozgásjavító Óvoda, Általános Iskola, Gimnázium, Kollégium, Egységes Gyógypedagógiai Módszertani Intézmény, Hungary, Global Education Center Amsterdam, Netherlands, Tartu Herbert Masingu Kool, Estonia (coordinator), pupils and teachers alike, participated in the mobility activities in Oradea together with students and teachers of our school.

On the first day of the mobility, all guests were welcomed with bread and salt. The welcome speech was delivered by the coordinator of the host school, teacher Cărădan Adina, Mr. Inspector Negruțiu Florin, Headmaster Mrs. Sipos Lăcrimioara and Mrs. Deputy Director Marușca Angela. Students of C.Ş.E.I. "Orizont" Oradea prepared a short artistic program, a collage of poems and songs in English. After the presentation of the school institutions enrolled in the project with PowerPoint and Kahoot materials, the guests were invited to visit our school institution, offices and classrooms. All participants made products in the five workshops on Art Therapy afterwards. This was followed by a sightseeing tour of the city by the City Bus.

On the second day of the mobility, the mobility participants entered the classrooms, carrying out activities together with the teachers and students of C.Ş.E.I. "Orizont" Oradea. Ph D Kevin Storm, professor at Global Education Center,

Netherlands held the course "Gamification in Special Education" for students and

Δ

teachers participating in mobility. The students took turns using VR glasses to complete the drawings on the tablet. The beauty of Oradea Fortress and its surroundings was admired by the participants in the afternoon of this day.

On the third day of mobility, all participants monitored gamification activities held by the teachers of C.Ş.E.I. "Orizont" Oradea. The participants in the mobility used the programs: Cospaces.io, Just a Line (AR drawing), Procreate (digital drawing app on ipad), Chatgpt. On a warm and sunny October afternoon, guests appreciated the beautiful resorts of Felix and 1 Mai and a countryside domain.

On the fourth day, the participants visited the castle in Ciucea and spent good quality time at Turda Salt Mine.

Day five was interwined with activities of students, accompanied by their teachers, who spent several hours at Aquapark Nymphaea. Activities to be followed within the project were discussed by the coordinators.

All project objectives: openness to European multiculturalism, integration of both students and teachers in transnational groups, development of cognitive, cultural, social experience, promoting teachers' openness to using gamification method in the classroom, establishing exchanges of international best practices, are fully fulfilled through sustained activities.

School activities, visiting together tourist points of international interest: Felix Resort and Turda Salt Mine, working in transnational teams, supporting students in activities they enjoy on gamification, building relationships, exchanging good practices, developing skills, are elements that bring a huge gain in the personal development of each within this Erasmus project.

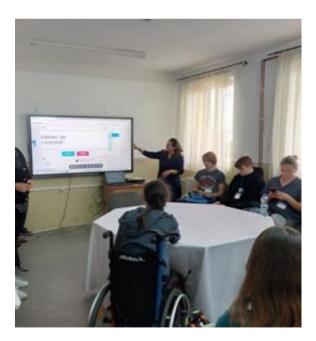

International Competition "Having Fun in Learning - Gamification"

Teacher Cărădan Adina

Centrul Școlar de Educație Incluzivă "Orizont" Oradea

One of the activities carried out during the Erasmus KA210 project "Having Fun in Learning- Gamification" was the International Competition of posters held on the 15th of November 2023 at the "Horizon" School Center of Inclusive Education Oradea by the project team.

Posters made of recyclable materials on the topic of gamification were the subject of the exhibition within the International Competition in the framework of the Erasmus KA 210 project "Having Fun in Learning- Gamification", project identification number 2022-1-EE01-KA210-SCH-000081117.

A number of 104 works coordinated by teachers in Romania, Croatia, Turkey, Estonia, Poland, Hungary were judged and the First Prize, Second Prize, Third Prize, Mention and Participation Diplomas were awarded.

Some of the works are exhibited in the Erasmus Corner in the "Horizon" School Center of Inclusive Education Oradea and on the Gamification Facebook group.

Photos of some of the works:

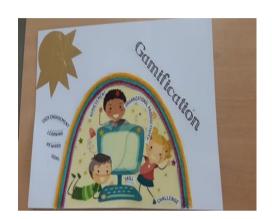

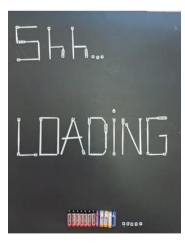

Erasmus Mobility Report

English teachers: Judit Gyulavári, Andrea Barcsiné Zámbori Mozgásjavító Óvoda, Általános Iskola, Gimnázium, Kollégium, Egységes Gyógypedagógiai Módszertani Intézmény, Hungary

It was a great pleasure for us to participate in the Erasmus Mobility + Project.

The training course is called "Having Fun in Learning: Gamification" and has had several international stops, including firstly our institution, Mozgásjavító EGYMI in Budapest, then Amsterdam and Tartu in Estonia in spring and Oradea, Romania in autumn.

We were able to learn a lot of new things, some of which we would like to highlight. In the Netherlands, we had the opportunity to learn about Lesson Up, Nearpod, CoSpaces and Soundtrap.

Later, my colleagues and we tried out several of these. We already integrated Lesson Up into our lesson plans during the course in Amsterdam. This interface is similar toPowerpoint, where you can insert slides one after the other, and also include pictures, diagrams, youtube videos. You can use different layouts. The disadvantage is that it requires a subscription. The CoSpaces app is a great way to spice up your lessons. It's an AR - VR (Augmentive and Virtual reality) where children can experience and even create a virtual space themselves. For example, for a history lesson, they can design a specific historical site. So, for example, students can take part in a Roman battle themselves. In this way, they will remember the period, the customs of the people, the style of building, the way people of that time dressed. We have included CoSpaces in several of our lesson plans and tried it out. For example, we used it to teach the seasons in English. We have also used the Lessonup app to teach Zero Conditional in English class, and to teach the different sentence types in grammar class and reading comprehension in reading class.

In Tartu, Estonia, we also had the opportunity to participate in a theory session for teachers about children who live with Autism Spectrum Disorder or have been traumatised in their family. Then we had the opportunity to attend classes where children with autism spectrum disorder go. It was a significant experience for us as we have an increasing number of students with ASD in our institute, too. We also had the opportunity to attend an AAC class where a special device called Tobiidynavox helps and develops the speech understanding and speech production of non-speaking children. It was very interesting to observe the work of the speech therapist there.

In Oradea, our students were also able to learn how to use VR wisely and in a useful way. And we, teachers, learned how to use ChatGPT well and were taught how to use the AI to create certain cultural, school programmes and events.

Apart from the splendid experiences, the development and strengthening of international contacts, we have gained a lot of useful and applicable knowledge during the project.

Gamification

Teacher Kevin Storm, Amsterdam kevin.storm1980@gmail.com

The word itself has not existed very long.

Its existence alone confirms the essence of it. Something new happened along the way that we did not yet have a word for.

This is what we do as humans. We continuously progress towards new endeavours and new exciting adventures.

Sometimes we discover things along the way that we have never seen before. When we deem them important enough, we name them.

Like pets we can classify a newly discovered bird species with a single Latin description, but once we get personally attached to it, we wish to name it for ourselves, our dog Snoopy, my bird Polly.

If we apply this principle to education, we are touching at the very core of gamification.

The word gamification covers most of the basics; to introduce elements of fun, rewards, challenges and competition into our learning skills.

But our classrooms, each individual student, they are all so vastly different that we cannot cover our tactics with a single word.

Which is why we can apply the basic principles, but we can never reach a "fit-forall" theory.

That is our job as teachers. Or better yet, our duty.

Each child is a blank canvas in many aspects. We as teachers have the paint and the brushes and in far too many cases we paint that canvas and let it dry forever into something that resembles knowledge, but more often than not does not mean a deeper understanding of the matter.

Regurgitating French words has never led to an Englishman becoming a French poet. It is the love for that language, the joy in learning that inspired the creativity and the skill level needed to make it one's own. We must hand the brushes over to the children

and be prepared to wash the paint off the floor, off the table and walls and forgive them for it because they are learning. The faults we consider faults inspired Pollock to break the rules. Let the children make mistakes and trust that learning happens in peripheral view, never in plain sight. Dare to leave the canvas blank for longer than you'd like, and understand that doing nothing, reaching no new goals, is the same process as the painter staring at a blank canvas for hours before creating the masterpiece. Believe in time needed and in the child's abilities to learn at its own pace.

Gamification means we need to inspire, to create enough incentives for the students to want to finish the next level.

No computer game is a satisfying experience unless it makes us feel something. The fastest levels of Tetris create stress and panic but sheer excitement when completed. There will always be gamers, who want to push further and reach new levels, but the principle remains the same; we want to feel the excitement and pride in having reached that new level just to be able to prove we did it.

It is our job as teachers to create experiences that make the students feel something. At every new benchmark a new reward, at every new level a sense of pride. It is our job to tailor these to the individual needs of our children. Game design takes years upon years, even for a game that players can finish in less than twenty hours. But the experience of living that story, that stays with you forever. Ask anyone about their favourite game they ever played and they will be able to describe why and what made it so special. Let it be our challenge to let the future answer to this question be some game WE created in the classroom.

And along the sideline, that game was how the child learned English, or math, or geography.

Believe in the power of fun and for all that is true, let go sometimes.

It's ok to crash your Mario Kart sometimes.

Educational Training on Gamification within the Erasmus Ka210 "Having Fun in Learning- Gamification" in Amsterdam 19th to 24th of March, 2023

Teachers: Şipoş Lăcrimioara, Ficuț Adriana, Lezeu Crina Centrul Școlar de Educație Incluzivă "Orizont" Oradea

Mobility objectives:

- Acquiring professional skills by experimenting with creating lessons through gamification;
- Creating interactive educational materials with game content in accordance with students' needs;
- Gaining experience in different educational approaches that can be used in special education;
- Development of professional skills according to the needs of the XXI century;
- Improving language skills, self-confidence and motivation.

The selected participants to represent Centrul Școlar de Educație Incluzivă "Orizont" Oradea were three teachers: Şipoş Lăcrimioara, Ficuț Adriana, Lezeu Crina.

The first day. The meeting took place at the Educational Global Center where we interacted with the partner project teams, respectively, the partners from Hungary – Budapest, the Netherlands – Amsterdam, Estonia – Tartu, respectively Romania – Oradea, each team presenting its educational unit and activities performed in the school. We were introduced to the Dutch education system, teambuilding activities, as well as exploration and design activities based on examples of good practice.

The next day we were invited on a thematic trip to get to know the beauties of Amsterdam, its history and traditions. On this day we substantially improved our language skills, because we were together all the teams participating in the mobility, we interacted, we socialized, which also contributed to increasing group cohesion, in addition to developing language and vocabulary in English.

On the third day we were presented the new learning and game creation platforms that contributed to the development of the ability to apply the gamification method in the classroom using theoretical approaches and practical activities, taking into account the particularities of students.

On the fourth day we became familiar with the use of free online software, freely accessible to students and teachers. We were also introduced to some basic notions of rhythmic programs, games, designing our own 3D worlds and projecting ideas into our own reality. The collaborative tasks in groups were presented to everyone. An attempt was made to design activities for children with special educational needs, and in the end, each team got a feedback from the trainer.

The fifth day continued with group cohesion exercises as well as sharing similar educational experiences. In the end, we were awarded certificates of participation in mobility.

We came back richer in knowledge and better prepared to use gamification and digital platforms (Roblox, Chat GPT, etc.), in the activity we carry out in classes or individually, with students with SEN.

Date: 20.11.2023	Grade level: preschool students, masstream
	kindergarten
Teacher: Albu Nicoleta, Grădinița cu	Subject: Speech Therapy
Program Prelungit "Degețica" Cihei,	Theme:"Blossomed Margaret"-
Bihor, Romania	reconnaissance and practice game

Competences:

- exercise the ability to recognize and classify objects from the environment

Materials:		Sources:
Computer,	video	https://timlogo.ro/games/C_MOD_P_MARGARETA/index.php
projector		

Procedure:

The child will recognize the objects t hat appear on the screen in a panel, and will fit them into a certain category. On this occasion, the teacher may encourage the child to pronounce those words.

The words that appear in the game are of two types, respectively of the two categories chosen by the player or the teacher at the beginning of the game. The child must recognize the word in the picture or from the text, decide which category it belongs to and then place the card to the left or right, depending on the category of that word. For each word correctly solved, the daisy receives a petal. Only if all the words are sorted correctly, the daisy acquires all the petals. For an even more efficient use, we recommend to the LogoPEDIA facilitator to encourage the child to pronounce the word before placing it in a category.

The game has two levels:

- Beginner- in the panel there is a picture displayed .The difficulty of pronouncing words is lower
- Advanced- only the written word is displayed in the panel writing and the image appears when the panel is fixed in the chosen category.

Evaluation: At the end of the game, children who correctly solve tasks will be congratulated by having an emoticon.

Time:

20 minute

Date: November, 202	3	Grade level: the 8 th grade, mass stream school
Teacher: Ardelean	Liliana,	Subject: English

Description : The proposed resource was created on the Canva platform, is	Time:
presented in the form of 13 slides that, from a methodological point of view,	45 min
include hearing and viewing exercises, filling in missing text, solving a	
crossword, answering questions, brainstorming aimed at deepening vocabulary	
by describing activities or situations identified in audio-video materials.	
Procedure:	
1. starting from the title, the teacher presents the CONTEXT in which the material	
fits through a summary of the first part of the story (3 min)	
2. vocabulary activation - the teacher introduces the students to the following	
vocabulary fixing exercise by filling in blanks in the text of a song they will be	
listening to. (2min)	
1.A. FIRST AUDITION - students receive worksheets - printed - which they will	
fill in, in pairs, with the words they remember from the audio text. Students are	
given 3 minutes for a quick reading of the text. (10 minutes)	
https://youtu.be/954XVkSg4gM	
3. The teacher proposes to the students to solve a task consisting of completing a	
crossword puzzle - containing keywords necessary for solving subsequent tasks	
(10 minutes)	
4. The students narrate the action in the video orally, using given words/phrases	
(5 minutes)	
5. Lead out: Karaoke (5 minutes)	
Evaluation: formative evaluation	5 min

Date: 06.11.2023	Grade level: the 7th grade, special school
Teacher: Árkosi Iuliana, Centrul	0
Școlar de Educație Incluzivă	Theme : Revise using the Ulwilla Model
"Bonitas" Oradea, Romania	

Competences:

- recapitulation and systematization of musical knowledge (melody, rhythm, text) related to the repertoire proposed for this purpose
- correct and effective use of Ulwilla's educational and musicotherapeutic model of colored Score

Materials:

- -wheel of fortune obtained gamification method
- colored scores
- xylophone equipped according to the Ulwilla music therapy/education model
- -guitar
- -other small percussion instruments

Sources:

https://hu.piliapp.com/random/wheel/

The colored scores are my own achievements.

Procedure: Conversation, explanation, exercise, observation, interpretation, learning by discovery, learning by intuition colored score, playing, singing in variations, musical playing.	
Evaluation: - verbally, by appraisals - grades, ratings	5 minutes

Date: November 2023	Grade level: the 8th grade, special school
Teacher: Araiman Rodica,	Subject: Socioemotional Abilities
Laslou Georgeta, Centrul Școlar	Theme: My emotions
de Educație Incluzivă "Orizont"	
Oradea, Romania	

Competences:

By the end of this 45-minute less on, students with special educational needs will be able to:

- Identify and express basic emotions (happy, sad, angry, scared) through facial expressions, gestures, and body language
- Associate emotions with specific situations or events
- Understand that emotions are a normal part of human experience and can be expressed in a variety of ways
- Practice coping mechanisms for managing strong emotions

Materials:	Sources:

	https://wordwall.net/resource/25215772/english/months-of-the-y

Procedure:	
 1. Warm up: using Co spaces to warm up the knowledge (seasons) acquire the previous lesson in an interactive way. T: "Look at the 3D cube on the screen (or in AR view: Look at 3D cube on the floor)." "What season is it?" (Students can see a winter 	8 min
landscape.)	
- S: "It'swinter."	
- T: "OK, let'see if you're right." (Teacher/ Students tip(s) the cube	5 min
over – and the word "winter" can be seen.	
- T: "Yes, you are right." "Good job."	3 min
2. Practice :revising the seasons, practising spelling of the words.	5 min
- T: "Open your workbook on page 23. Look at ex.1. Match the words	
(seasons) with the pictures and write them to the gaps."	
3. Reading comprehension:	
- T: "Read the text about the boy Luc, who is from France."	4 min
- T: "Write the name of his favourite season in the gap."(Autumn)	8 min
4. Writing : to make grammatically correct sentences using words	
- T: "read the words and write sentences."	

(eg.: trees/The/are/big – The trees are big)

- 5. **Revision**: revision of the months with the help of wordwall.net. https://wordwall.net/resource/363117/maths/months-of-the-year
 - T: "Use your tablet/phone. Put the months in order. (e.g.: 1st January, 2nd February etc.)"
 - 6. Pairwork revision of months and ordinals.
 - T: "Work in pairs. Ask and answer. Which is the sixth month of the year? It's June."

(Students can check their answers with the help of their tablets)

- 7. **Revision of vocabulary (spelling of the months)** with the help of Wordwall.net: https://wordwall.net/resource/25215772/english/months-of-the-year
- T: "Use your tablet/phone. The letters are jumbled, put them in order to get the name of a month."

Evaluation: "Did you like the lesson? Which was your favourite part?"

2 min

Lesson Plan

Date: 23.11.2023	Grade level: secondary level, special school
Teacher: Bele Mihaela Cristina, Centrul Școlar de Educație Incluzivă "Orizont" Oradea, Romania	•

Competences:

General skills: speaking, listening, game in wordwall

Operational objectives:

Oc1- to engage and activate all students to interact and communicate

Oc2- to practice the days of the week and the months of the year

Oc3 – to create interest on the topic, talking about weather and seasons

Oc4- play the weather game, in wordwall

Time:

40

min.

Materials:

m1-images, flashcards

m2 - whiteboard "

m3- handouts

m 4 -interactive activities

Methods.and procedure:

conversation, explanation, dialogue

Sources:

https://wordwall.net/es/community/cum-e-vremea

https://wordwall.net/es/resource/8076463/cum-este-vrerafar%C4%83

https://wordwall.net/es/resource/8583047/cum-este-vrer

Procedure:

1. Organizational moment, warming up activity

A relaxed atmosphere is created by dialogue with the students about weather. I ask students to describe today's weather. Then have them look around the room and discuss how their class clothing reflects the weather.

2. Capturing attention and announcing the theme:

In today's lesson we talked about the weather and now we will watch the ppt presentation that I prepared for you. Pupil pay attention to the ppt presentation

3. activity: I show pictures representing different seasons and ask them to name the seasons: spring, summer, autumn, winter and after that we will discuss the seasons and the specific weather of each season, we discuss the natural phenomena specific to each season - sun, rain, thunder and lightning, snow.

4. Consolidation of knowledge:

With the help of worldwall we implement and consolidate all this knowledge and the children are delighted with the application

https://wordwall.net/es/community/cum-e-vremea

https://wordwall.net/es/resource/8076463/cum-este-vremea-afar%C4%83

https://wordwall.net/es/resource/8583047/cum-este-vremea

Evaluation: each child receives an individual sheet and tokens - which must be suitable to the cognitive level

5 min

Lesson Plan

Date: 23.11.2023	Grade level: secondary level, special school
Teacher: Birău Florica Daniela,	Subject: "The Lion and the Mouse"
Centrul Școlar de Educație Incluzivă	
Nr. 1 Oradea, Romania	

Competences:

Training and development of the ability to communicate through oral language

Materials:	Sources:
Mp4 – Video	https://app.screencast.com/Y2vxvuhLizpVP

Procedure

A favorable climate for the activity is established. The necessary materials are being prepared. Attention capture is done by watching a story "The Lion and the Mouse" - The moral of the story is "Be good and you will make good

Time:

40 min

friends."

After the end of the story there are some activities to do.

- The little ones have to make their friends from the jungle, the lion and the mouse, following the described steps.
- Adults to write their own composition about the best friend

The subject of the lesson is announced: The Lion and the Mouse. The objectives are communicated in terms accessible to the students in order to motivate and raise their awareness in the learning effort.

I will present the model board to the students and explain the work technique.

Intuition of the materials necessary for the realization of the work:

Students are informed that the board with the final product is only indicative. Students will work in pairs. Each pair has the necessary materials on the work table: colored paper, colored cardboard, scissors, glue, leaves, card board sheet templates for assembling the work.

After the observations, I will discuss with the students about the materials used to make the work and the way of working.

I will explain and demonstrate the stages of the work:

The students will repeat the tasks and complete the work proposed.

During the work I will closely supervise the students, intervening where appropriate; I will help and guide clumsy students.

	0011101
A musical background is provided: "Azorel and Miaunel" Completed work will be displayed on a board.	
Evaluation:	5 min
Students are asked to rate the papers according to the following Criteria:	,
- respecting the work technique;	
- correctness of cutting;	
- arranging the elements;	
- the accuracy of the work;	
- degree of completion.	
Assessments are made regarding how students have participated in	the
lesson. Qualifications are awarded.	
Students are instructed to collect their materials in order and clean to workplace.	heir

Lesson Plan

Grade level: 2 nd grade, mass stream school
Subject: Science
Theme: The Solar System

Competences:

By the end of this 45-minute lesson, students will be able to identify the planets in the Earth's solar system. Students will be able to determine the position of the planets from the sun and present a few informations about them.

Materials:

- Visual aids (flashcards, pictures on a whiteboard)
- A laptop, projector, tablets
- Printed handouts with exercises

Sources:

https://www.youtube.com/watch?v=XIBIVNtzymU https://www.twinkl.ro/ar-3d/resource/the-solarsystem-augmented-reality-ar-3d-quick-look-modelt-ar-1659593974#

WASINGO ROOL	UGIIIGI 20
Procedure:	Time:
Introduction: Greeting the students Warm-up questions: "What did you do yesterday?" or "Can you tell me anything you did last weekend?" Tell students that they will be learning about the planets today. Ask students if they can name the planets. List the names of the planets on the board and see on the screen.	5 minutes
Explicit Instruction/Teacher modeling: Ask students if they know where each planet is located in relation to the Earth. Explain to students that there is a trick to remembering the planets in relation to the sun. Explain to students that they can easily remember the planets' relation to the sun if they memorize the sentence, My Very Energetic Mother Just Served Us Nachos. Explain that the first letter of each word in that acronym represents the name of a planet in relation to the sun. Watch the youtube video and sources from Twinkl.ro on the screen.	15 minutes
Guided practice: Ask your students to complete the worksheet Our Solar System with a partner Remind them to use the acronym to help them complete the worksheet. Go over the worksheet as a class. Give each student the Planet Crossword Puzzle worksheet. Complete the crossword as a class by asking students to guess which planet is represented by each picture. Tell students a fact or two about each planet as you have them fill out the crossword. For example, Saturn has rings, Pluto used to be considered a full planet, and Jupiter has a famous red spot.	15 minutes
Evaluation: Summative assessment: At the end of the lesson, students will take a Kahoot game to test their knowledge about the Solar System. Teacher-student interaction: Monitor students' responses, providing corrective feedback and support as needed.	10 min

Date: November the 15th, 2023	Grade level: the 3rd grade, mass stream school
Teacher: Brînzac Ana, The "Nufărul" Primary School Rontău, Bihor, Romania	Subject: Science Theme: Pollution and environmental protection

Competences:

- 1.1 Identifying some characteristics of living and non-living bodies;
- 3.2 Observing the consequences of one's own behavior on the surrounding environment;

Procedure: material created in CANVA	Time:
"Autumn Features" is an activity to revise knowledge about the autumn season. Students will answer questions about the autumn season using the images from the created resource. What is autumn? What are the signs of the coming of autumn? What do people do in autumn? What do wild animals do in autumn? The lesson can be simplified or complicated depending on the individual characteristics of each student. The lesson aims to develop students' vocabulary related to the autumn season. At the end of the activity, the students have an activity sheet, which can be found in the material. This activity sheet is designed according to the level of each child. Some students will answer questions in writing, others will divide the words into syllables: autumn, animals, people and will say where the sound "A" is to be found in these words, another group will draw aspects of the autumn season. At the end of the activity, students will be verbally assessed on how they engaged in the activity.	40 min
Evaluation: Worksheet	5 min

Lesson Plan

Date: November, 2023	Grade level: secondary level, special school
Teacher: Cărădan Adina Mioara,	
Centrul Școlar de Educație Incluzivă "Orizont" Oradea, Romania	Theme: Seasons

Competences:

- Receiving simple oral messages in everyday communication situations
- Speaking orally in everyday communication situations
- Receiving text messages in everyday communication situations
- Writing messages in usual communication situations (minimal)

Materials:	Sources:
	https://www.lessonup.com/en/lesson/LFQo7TyHwv5PAn3G6?utm_sourc
	e=app&utm_campaign=shared-lesson-
	app&utm_content=1648631854049&utm_medium=shared-link
	wordwall.net/resource/28470881/seasons

Procedure:

Time The lesson starts with a warming up activity, all the materials are prepared 40 min for the lesson, short discussion on weather

The attention grabbing activity uses a crossword puzzle, students find the name of the lesson: "Seasons".

The teacher shows pictures of seasons and students make up sentences with the weather and seasons. The teacher presents the four seasons in terms of weather, temperature, activities to do.

Then the lessonup activity created for this lesson helps students learn more

https://www.lessonup.com/en/lesson/LFQo7TyHwv5PAn3G6?utm_source=ap p&utm campaign=shared-lesson-

app&utm content=1648631854049&utm medium=shared-link

The digital material contains 13 slides with interactive quizzes, text slides and video. The song is taken from English singsing.

The assessment of the material conveyed in the lesson is made through the wordwall digital material wordwall.net/resource/28470881/seasons created for the students by the teacher. The templates of the game are interactives: True or false, group sort, anagram, gameshow quiz- a multiple choice with time pressure, lifelines and a bonus round, hangman.

Evaluation:

The teacher shows a picture to each student, students try to make up a correct sentence in order to describe the picture better.

5min

	stream kindergarten
Teacher: Cioara Florica Mihaela, Grădinița	Subject: Personal development
cu Program Prelungit "Degețica"	Theme: "Mysterious treasures"-game
Kindergarten Cihei, Bihor, Romania	

Competences:

-formation of association among word, image and meaning.

Materials:	Sources:
Computer, video projector	https://game-game.ro/233920/

Procedure:

The game consists of a matrix of playing cards that appear on the reverse. The player must return a book, to see and recognize and then to memorize it. The goal is to find pairs of cards that when they're found they'll stay back with the girl.

In this way the concept of a book is seen in two submodalities, text and image. The child must make the connection between the two by association with the generic, more abstract concept. Through this operation, the player is forced to form abstract classes in the mental model.

By encouraging the child to pronounce the word when the teacher shows the image, the game becomes a pronunciation exercise one.

Evaluation:

At the end of the game the child will be congratulated by being offered an emoticon.

Time:

20 minutes

Teacher: Dume Camelia Emanuela, Centrul Școlar de Educație Incluzivă	Subject: Commucation and Speech Ability
,	Theme: Autumn Colors- Art Class

Competences:

General skills:

Making useful and/or esthetic products through the independent application of work techniques specific to occupational therapy.

Operational objectives:

Oc1- to specify some characteristics of autumn

Oc2 – to name autumn flowers

Oc3– list autumn colors

Oc4 – play the autumn game, in wordwall

Materials:	Sources:
A flower, a leaf pattern work coloured with the sponge	https://wordwall.net/ro/resource/
A model work "Autumn painting", sponges, watercolors,	60201275/logopedie/toamna
colored pencils, felt tip pens, brushes,	
Glue, scissors, Autumn interactive activities cards	https://wordwall.net/ro/resource/
	58130129/vocabular/toamna

Procedure: Time 1. Organizational moment: 40 A relaxed, pleasant atmosphere is created for the activity that will take place. 2. Capturing attention and announcing the theme: The Autumn Fairy brought colors of all shades and put them in everything that surrounds us and assures us that she, helped by the sun and magic, will help us color everything we set out to do in today's lesson. In today's lesson we will use autumn colors in our works: we will color leaves and flowers, we will make a colorful autumn painting. 3. Carrying out the activity: To begin with, the Autumn fairy will ask us to color the white dots of the Leaves and flowers with the right color. For thi, we need these sponges, watercolors and some water. I announce the students that they will complete the work by going through the following work stages: choosing the right color for the drawing; dipping the sponge in the color and filling the white spaces with the right color. Presentation of the model paper. I will ask students to recognize and name the materials they have available. We put the sponge in the right color and fill the white spaces so that we get a correctly colored leaf or flower. Before starting the work, the students are asked (repeated with them) to list the work steps using the model work. They will then be asked to perform some hand muscle warm-up exercises. (it rains, it rains, it rains, the raindrops fall; we shelter in the house; then the sun comes out; we lie down; we applaud) Students work independently, but are constantly monitored, guided and helped if needed. The Autumn Fairy has seen that we are skilled and gives us to make a whole autumn painting. We will glue all the elements (cut colored leaves) and paint with the brush the other elements that make up the autumn landscape (trees, clouds, birds, etc.). This is the painting, these are the elements that we will need to glue. You can pair up and decide who is painting and who is gluing. The students work, but are constantly monitored, guided and helped if needed Students will work in pairs, helping each other. 4. Consolidation of knowledge: Children, together with the teacher, use games about the characteristics of the sea on the wordwall platform, to consolidate their knowledge of autumn: Autumn interactive activities: https://wordwall.net/ro/resource/60201275/logopedie/toamna https://wordwall.net/ro/resource/58130129/vocabular/toamna

5 min.

the works. There will be an exhibition of all the students' work.

Description:

The activity involves accessing links, each link containing a video material. In the first material, students are tasked to identify geometric figures and to associate them with objects from the environment and create a given model from geometric figures. The second link involves students repeating the geometric figure presented by the teacher, identifying the indicated geometric figure, arranging the geometric figures according to a given pattern (tree, house, train) and carpet. The third material asks the students to identify the geometrical figures and to match the figures of the same kind.

25 min

Time

Procedure:

Warming Up Activity, preparation for the activity.

The students are shown a video and are involved in an interactive activity with the use of canva and Livresq digital materials created by the teacher on the students' cognitive level.

Pupils have different work tasks during the activity:

- Identify the geometrical figures;
- Match the geometrical figures;
- Match each circle/ triangle/ rectangle/ oval with a similar given shape;
- Decorate the carpet according to the given pattern;
- Build a Christmas tree with geometrical figures;
- Watch the two videos and solve the given tasks!

Assessment: Solve the worksheet by joining the identical geometric figures with a pencil;

Evaluation: individual appreciations and praise

	uRYmgQo48nlAlxOywjKs2jT4/view?usp=sharing

Procedure:

It will start with an attention-grabbing activity - the "Enchanted Box" from which the children will extract an object and be invited to say its color!

The children will be introduced to the theme of the lesson:"The story of colors" - and a few words about what they will do during it.

I ask the students if they know the story of colors and I invite them to watch this story together.

 $\frac{https://drive.google.com/file/d/1Ra8NLJk-uRYmgQo48nlAlxOywjKs2jT4/view?usp=sharing}{}$

The running of the film will be stopped at each color and the students will be invited to name what they see on the screen highlighting the color, geometric shape, fruits, vegetables etc.

Students learn from this story in an age-appropriate manner how rainbows form. At the end, other questions will be asked about the viewed content.

The final challenge is both to make pairs according to the criteria of shape and color and to count the stars colored with the same color and to choose the number corresponding to the number of stars.

The song "Colors" https://www.youtube.com/watch?v=jERZKz_OZow

Evaluation:

Children are asked to get involved in the game "Sort by color!"- Montessori cards.

https://youtu.be/deOy2VwDQ30

51

Procedure: The text "A trip to warm countries" by Adina Popescu is a literary text and provides a lot of information about the migration of birds closely related to the change of seasons.

Time:

40 min.

In order to achieve the specific competence above, we carried out a group activity applying the cube method and the individual quintet. At the end of the lesson, the students will perform the song "Voice of the birds" - Listen and guess the voice of the birds. The tools used to create this interactive game are: phone or tablet, platform https://kahoot.com/

To create this QUIZ – The House from the Pot-Popular Story, you need to create a login account on the https://kahoot.com/

platform that helps you quickly and easily create the perfect assessment resource. Choose a template of the activity you want to create, enter the content used to create the chosen activity/game and get a printable and interactive activity pack. The digital educational resource created by me resides on the platform https://kahoot.com/ The game is based on 10 QUIZ-type questions in which the child has to choose the correct variant. The questions are built both with a voice message and as a text and with image support. For each question, the child has to choose the correct version of the question from the 4 existing ones. The image is suggestive of the correct variant. Played with 1 player | duration 5 min | age +8 years - unlimited lives. Speed is not scored, only accuracy. It is considered a mistake if the players choose the wrong option. Players are allowed multiple attempts.

The images used in this set of exercises are sourced from:

https://www.google.com/

esen with their favorite bird.

https://create.kahoot.it/share/o-calatorie-spre-tarile-calde-de-adina-popescu/72a65264-6e39-485f-afc0-dc4c0ce7ebd2

Evaluation: This was achieved throughout the activity through verbal assessments. At the end of the class I integrated MM and AVAP. Students will listen to the negative of the song "Swallow" and make a drawing of their favorite bird.

5 min.

Discussions will be held with the students about the departure of migratory birds and the fact that the swallow is a migratory bird that leaves our country in the fall and returns in the spring.

https://youtu.be/deOy2VwDQ30

Date: 12.12.2023		Grade level: 9 th grade, mass stream school	
		,	Subject: English Theme: "Going Shopping"
Oradea, F		**	,, 5 11 6

Competences:

- 1.1. Identifying the general meaning of a message
- 1.2. Anticipating the content based on visual stimulus
- 2.4. Filling up the forms
- 3.1. Expressing ideas/ opinions and personal points of view, during a discussion
- 4.3 Synthesizing the content of a written text in the form of a diagram / notes

Objectives:

By the end of this 50-minute lesson, students will be able to:

- 1. improve vocabulary with compound nouns related to shopping
- 2. compare traditional shopping with online shopping
- 3. discuss the advantages and disadvantages of each type
- 4. consolidate shopping vocabulary

Materials:	Sources:
-textbook	
- computer	-YouTube video online vs.traditional shopping
-video projector	- Quiz game <u>Vocabulary practice</u>
- printed handouts with exercises	

Procedure: Greeting the students	Time
Warm-up questions: "Do you like shopping?" "How often do you go shopping?"	
Explain that today, they will learn different words/phrases related to shopping	5 min
and discuss about the types of shopping they know.	5 min
The teacher asks students to take their mobile phones for the next activity. They	10 min
do a vocabulary online exercise, with words related to shopping they have encountered before. There are also some new vocabulary. They join a quiz on the	
platformhttps://quizizz.com, write the code of the quiz and start the online game	
Vocabulary practice	
YouTube Video: Play a short YouTube video that briefly presents online and	10 min
traditional shopping online vs traditional shopping	
After they watch the video, they discuss the main points.	
The teacher asks students to give examples of things they like to buy online and	10 min
things they buy from the stores and give reasons.	
Students make a list with advantages and disadvantages of online shopping versus traditional shopping.	
Group work.	
Each group presents their ideas.	
Students get a handout with shopping vocabulary. They match the phrases with	10 min
their definitions.	
Pair work activity. Teacher checks their work with the whole class.	
Questions from the Quizzes game that got many incorrect answers are projected and reviewed.	5 min
Evaluation:	
-Summative assessment: At the end of the lesson, the questions from the Quizzes	
game that got many incorrect answers are projected and reviewed.	
-Teacher-student interaction: Monitor students' responses, providing corrective	
feedback and support as needed	

Date: 14.11.2023	Grade level: preschool pupils,
	mass stream kindergarten
	Subject: Speech Therapy
Kindergarten, Grădinița cu Program Prelungit	Theme: "Flying balloons"
"Degețica" Cihei, Bihor, Romania	

Competences:

-correct use of plural and singular forms and correct use of agreement between subject and predicate.

Materials:			Source	es:		
Computer,	video	projector	Link	game:	"Baloane	zburătoare"-
_			https://	www.jocu	ripitici.ro/joaca	a/97/baloane-
			zburato	arehtml		

Procedure:	Time:
The player is encouraged to choose the correct form: singular or plural that best represents an image.	20 min.
On the screen, a clown collects balloons. The child is presented with two words (singular and plural) or two sentences, one correct and the other wrong.	
It is necessary to read the words/propositions and their evaluation in terms of grammatical correctness. Whenever the player chooses the correct form, the clown gets a balloon.	
Evaluation: In the end, if he chooses all the correct forms, the character will be happy and a congratulatory message of the player will appear.	5min

Lesson Plan

Date:16.11.2023	Grade level: the 9th grade,
	special school
Teacher: Jakob Koppel, Tartu Herbert Masingu Kool,	Subject: Physics
Estonia	Theme : Changing Parametres

Objectives:

By the end of the lesson students will know:

- How heat transfers from one medium to another
- What are the three main heat transfer types
- How different mediums and subjects transfer heat energy
- How is this topic important and connected with everyday life

Materials:	Sources:
 Textbook 	Simulations:
Phones	https://opik.fyysika.ee/index.php/book/view/70#/se
 Internet simulations 	ction/33881

Procedure:	Time:
 Greetings 	8 min
 Introduction of the lesson and its connection to our everyday life 	
Reading the textbook and discussing about real-life scenarios	12 min
 Let students open the simulations with QR code reader on their own phones Letting them to play around with different mediums and changing parameters (temperature, density etc.) Asking and answering students questions if they don't understand something 	15 min
 Making a brief summary of the subject Repeating the most important connections with everyday life Asking if someone has questions 	10 min
 Evaluation: Students will know how heat energy transfers in different mediums and what are the main three heat energy transfer types Students know how this topic is very connected with everyday life 	2 min

Date: 16.11.2023	Grade level: the 8th grade, special school
Teacher: Jakob Koppel, Tartu Herbert Masingu Kool, Estonia	Subject: Physics Theme: Penumbra and umbra

Objectives:

By the end of the lesson students will know:

- How shadows assemble
- What are penumbra and umbra
- Why and how can we see lunar and solar eclipse

Materials:	Sources:
 Textbook 	Videos:
Youtube	https://www.youtube.com/watch?v=VW2xRR75lKE&t=3s&

Lesson Plan

Date: 18.10.2023	Grade level: the 11th grade, special school
Teacher: Sirelin Koval, Tartu Herbert	Subject: English
Masingu Kool, Estonia	Theme: I Have a Dream

Objectives:

- Can understand and react to the opinions of four historians about a speech
- Discuss what are dreams

Materials:	Sources:
Outtakes of the texts	• Youtube video: Martin Luther King memorial
Youtube videos	unveiled in Washington
Phones or tablets	• Texts: <u>Screenshot 2023-10-27 at 11.36.07.png</u>

Procedure:	
 Greetings 	Time
• Introduction of the lesson: today we are going to talk about a famous	
speech relating to the topic of dreams	
 Showing a picture on the board (phrase "I have a dream" 	10 min
Discussion: who said it, what happened? What did he do?	
• Listen to the video what is the name of the memorial, what and when	
did it happen? Martin Luther King memorial unveiled in Washington	
• Read the texts: <u>Screenshot 2023-10-27 at 11.36.07.png</u>	
 Who expresses the opinion of Luther's speech the best, why? 	15 min
Mark all phrases/sentences that express the greatness of the speech	
Read the outtake of the speech: <u>I have a dream</u>	
What is meant by that	13 min
• Use the internet to find out other famous quotes from the speech that	
inspired others.	
Discussion, what is having a dream	
What would you write if it was your speech?	5 min
 Using mentimeter for feedback on phones. 	
Evaluation: Being able to analyse a speech and what can be the possible impacts.	2 min

Date: 24.11.2023	Grade level: the 4 th grade, special school
Teacher: Lavric Mariana, Școala Gimnazială Sanatorială Bușteni,	Subject: Mathematics Theme: Adding and Substracting Numbers
Romania	

Competences: learning to count, read, write and order positive whole numbers

The students will be able to:

-add numbers with up to 4 digits together;

-subtract up to 4-digit numbers.

Sources:
Platform: Online Access
Tech Requirements: Internet
https://www.bbc.co.uk/bitesize/topics/zy2mn39/articles/z6vr47h#zyn8
<u>mbk</u>
https://www.bbc.co.uk/bitesize/topics/zy2mn39/articles/zrtsy9q#z94tvj6
https://www.bbc.co.uk/bitesize/topics/zy2mn39/articles/z6vm6v4

Procedure:

Step1: The students will be reminded the procedure of adding four-digit numbers and

subtracting four-digit numbers by using the instructions on the learning platform:

• Addition of up to four-digit numbers:

https://www.bbc.co.uk/bitesize/topics/zy2mn39/articles/z6vr47h#zyn8mbk

Watch: How to use column addition?

Let's revise the basic method for column addition with this video:

What is column addition?

Did you know? The column method involves writing one number underneath the other.

Add the numbers, starting from the right.

The students will be given three examples, as set on the learning platform:

Time:

15min.

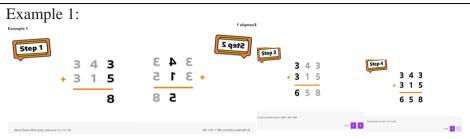

15 min.

Then, the teacher will prompt the students to remember each step of the procedure of adding four- digit numbers by using the checklist below: Checklist:

- When writing down sums, separate the numbers into ones, tens, hundreds and thousands.
- List the numbers in a column and always start adding the ones first.
- Estimate first and check afterwards it's a good idea to estimate a rough answer and then check your actual answer.
- Order doesn't matter for example, remember that 345 + 129 is the same as 129 + 345.
- Key words look out for these words in problems: total, sum, altogether, more. They all indicate an addition calculation.
 - Subtraction of four-digit numbers: https://www.bbc.co.uk/bitesize/topics/zy2mn39/articles/zrtsy9q#z94 tvj6

Watch: Subtracting up to four-digits

Numbers can be subtracted using the column method.

Watch this video to learn about subtracting 4-digit numbers using the column method.

Watch: Subtracting up to four-digits
Numbers can be subtracted using the column method.

The students will be given three examples, as set on the

learning platform:

Then, the teacher will prompt the students to remember each step of the procedure of adding four- digit numbers by using the checklist below:

5 min.

- Checklist
- Use the column method to help subtract large numbers.
- Separate the numbers into their place value of ones, tens,

GAMIFICATION

Erasmus+

hundreds and thousands.

- Start on the right with the ones column first.
- Estimate your answer first and then always check your actual answer.
- Subtraction is the opposite to addition, so subtraction can be checked by adding. For example, check that 182 37 = 145 by doing the sum 145 + 37 = 182

Look out for these words in problems: take away, difference, less than, minus, decrease, fewer than, reduce. They all indicate subtraction.

Step 2: The teacher will propose the students to play the game Mission 2110. This is a futuristic adventure game produced by BBC where players must use their skills at adding and subtracting to save the world and it can be accessed online at:

https://www.bbc.co.uk/bitesize/topics/zy2mn39/articles/z6vm6v4

This game provides revision addition and subtraction.

Students will play in pairs to be able to traverse the game space and collect the bio rods, thus saving the world. Student pairs will compete against each other, in trying to solve the 4-digit addition and subtraction

Following playing the game, the teacher will engage the students in a discussion using these questions:

- Would you choose to play this game again?
- Is this game fun to play? Why? Why not?
- How would you categorize this game?
- How would you improve this game?

Would you say you improved some skills within this game

Evaluation: The students will take the quiz included on the webpage: https://www.bbc.co.uk/bitesize/topics/zy2mn39/articles/z6vr47h#z4rxfdm

10 min.

Date: 20.11.2023	Grade level: the 2 nd grade, special school
Teacher: Lezeu Crina, Centrul	Subject: Therapies and Intervention Programs
Școlar de Educație Incluzivă	Theme: The vowel game/ Vocal Game
"Orizont" Oradea, Romania	

Competences:

General skills:

Training in the skills of receiving, structuring and delivering the oral message;

Specific skills:

Training and development of oral language communication skills;

Operational skills:

- -To listen carefully to the proposed song/To learn the vowels of the Romanian language;;
- -To pronounce the 7 vowels (a, e, i, o, u, ă, î);
- -to associate the capital letter with the small letter (A-a);
- -to exemplify a word starting with each of the 7 letters/vowels;
- -to solve the worksheet independently;

moderate intellectual disabilities,	vocalelor
Bucharest, 2021; Resources	3. Worksheet
available online wordwall,	
youtube;	

Procedure:

Time:

40 min.

- **I.** Organisational moment: the teacher prepares all the necessary materials and has a short conversation about how the activity will be carried out;
- II. Attention-grabbing: this will be done through a song that resides on the youtube platform and is very much related to the theme of the activity;
- III. Announcement of the theme and objectives: the subject of the lesson will be presented to the two students in the speech therapy cabinet (in their own language);
- IV. Directing the learning:

A short conversation will be held on the vowels of the Romanian language;

With the help of the computer available in the office, access the game on the wordwall platform, and the students will name each of the 7 vowels individually and make the corresponding associations (small-large letter);

Depending on the time available, the game can be replayed as often as desired;

Afterwards, each pupil will exemplify a word beginning with each of the 7 vowels and orally compose a sentence based on the chosen word;

Evaluation:

5 min.

Students will receive a worksheet, which they will solve independently;

- -In item 1/ they will circle only the vowels (no matter what letter they are rendered with/the letter of the letter.
- -In item 2 they will colour the pictures that start with a vowel sound (e.g. needle, elephant, heart, egg, umbrella);
- -In item 3 they will verbally compose a sentence of at least 4 words in which each word begins with a vowel (example: I'm getting an ice cream.)

Each student will receive a reward for their involvement in the activity;

Romania	·

Competences:

The student will count, read, write and order positive whole numbers.

The students will be able to:

- practice fact families addition and subtraction bonds to 20
- -to practice quick recall of number facts, up to 9+9
- -represent and use number bonds and related subtraction facts within 20
- add and subtract one-digit and two-digit numbers to 20, including 0

Materials:	Sources:
Computer	Platform: Online Access
Paper, pencils	Tech Requirements: Internet
T · , T	https://ictgames.com/mobilePage/funkyMummy/index.html
	https://www.bbc.co.uk/bitesize/articles/zjn3gwx#znpk239

Procedure: Step1: The students will be reminded the concept of fact families, as explained on the learning platform:	Time:
explained on the learning platform: Fact families	15 min
Wotch this slideshow all about creating a fact family.	
+ = 18 3 15	
Foct families are mode from three numbers. The numbers in this fact family are 18, 3 and 15, 18 is our whole, 15 represents the red counters and 3 represents the yellow counters.	
The teacher then explains to the students the concept of part whole models.	
Part whole models A part whole model can be helpful when working out simple colculations. They are a visual representation of writing out numbs sentences and can help solve missing fact family numbers.	
8 + 7 = 15 7 + 8 = 15 15 - 7 = 8 15 - 8 = 7	
Here is a different fact family. In this case, there are 8 red counters and 7 yellow counters, so the three numbers in this fact family are 8, 7 and 15. The concept will be modeled by the teacher	
through the fallowing example:	
Example 1 Have a look at this part whole model.	
12 8	
The model shows that the numbers 20, 12 and 8 are part of a fact family. The number 20 is made of two parts, 12 and 8. The diagram can help you work out possible number sentences in the fact	
fomily. 12 *8 = 20 8 * 12 = 20 20 - 8 = 12 20 - 12 = 8	
Step 2: The students perform the activity given on the learning platform:	10 min

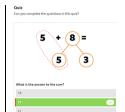

Step 3: The teacher proposes the students to play the Funky Mummy Game:

10 min.

https://ictgames.com/mobilePage/funkyMummy/index.html

Funky Mummy is an online game that is designed to practice quick recall of number facts up to 9+9. If the player presses on the correct sarcophagus the mummy will come out and perform a dance. At the end of the game, the student will be able to write in his name in hieroglyphs. This is a very short game that can be played in class to practice some quick number facts.

Students will join in pairs to help each other add up numbers.

Students will also be encouraged to play their own number games, by assigning new numbers to each other.

Evaluation: The students will play the game Smoothie Maths

10 min

https://ictgames.com/mobilePage/smoothie/oldcdn.html

Date: the 16th of November 2023	Grade level: the 8th grade, special school
Teacher: Marten Pirts, Tartu Herbert Masingu Kool, Estonia	Subject: English Theme: Comparison of Adjectives
	_

 Procedure: Greetings; The teacher asks some random questions, for example "Which car is faster – Bugatti Veyron or Lamborghini Gallardo?", "Which skyscraper is higher – The Empire State Building or Burj Khalifa?", "Who is bigger – a zebra or an elephant?" etc. 	Time 3 min
 The teacher asks what the students remember about the comparison of adjectives (comparative form only) – short adjectives such as "big", "fast", etc, long adjectives such as "beautiful", "dangerous", etc and exceptions such as "good" or "bad". The teacher plays the video "Comparatives: The Grammar Gameshow o Episode 15". 	12 min
The teacher explains that it was a humorous/satirical Grammar Gameshow and in real life it is not nice to compare each other using so-called bad adjectives.	5 min

• The teacher asks students to name some so-called good adjectives and make comparisons (not about students). For example: "I think that roses are more beautiful than tulips" etc.	
The teacher asks students to create a grammar Quiz or Kahoot about comparatives. The teacher helps students if necessary. The Quizizz'es or Kahoot's will be played in the next lesson. If the students don't have enough time to finish the grammar game, it will be their homework.	20 min
The teacher wraps up the lesson.	5 min
Evaluation:	
 The students remind adjectives (mostly so-called good adjectives); The students remind forming the comparative form; The students practise using the comparative form and creating a Quizizz or Kahoot for their classmates. 	

Date: 16th of November 2023	Grade level: the 9th grade, special school
Teacher: Marten Pirts, Tartu Herbert Masingu	Subject: History
Kool, Estonia	Theme: The Treaty of Versailles

Procedure:	Time	
 Greetings; Questions about World War 1 (the teacher asks questions and the students answer. If the students don't remember, then the teacher reminds them); Introduction to the topic "The Treaty of Versailles". 	7 min	
· The teacher talks briefly about the Treaty of Versailles;	20	
 The teacher hands out the worksheets "The Treaty of Versailles" and explains what the students have to do (watch and listen to the video and complete the gaps meanwhile the teacher makes pauses); The students watch and listen to the video, fill in the worksheet. 	min	
 The teacher and the students check the worksheet (teacher asks questions an students answer, if there are any misunderstandings or blank gaps, the teacher explains or shows some parts of the video again). The teacher points out that the final exercise has to be done at home. Students can use the Internet to complete the task. 	d 13 min	
The teacher makes a brief summary about "The Treaty of Versailles";The teacher ends the lesson.	5 min	
Evaluation:		
 The students remind the topic "World War 1"; The students get to know about the Treaty of Versailles and how it "made" Germany to start another, even worse war. 	5 min	

Date: 24.10.2023	Grade level: the 1st grade, special school

Procedure:	Time:
Preparating the necessary materials for the smooth running of the class. I will announce the topic of today's lesson and the pursued objectives.	5 min.
He introduces himself to the students'riddles.	5 min.
I will present students with the component parts of the human body through the educational game "Piticlick".	5 min.
Also with the help of Piticlick we will establish the parts of the body indicated by him.	
	5 min.
I will show the students a flipchart. Pinocchio does not know how to read and does not know how to put the name of each part of the body in place. Requirement: read the word on the card and put it in the correct place.	5 min.
Requirement. Tead the word on the eard and put it in the correct place.	5 min.
Each child receives an envelope containing cut-out human body parts and must correctly assemble the girl or boy by placing each component in its place.	5 min.
no piace.	
The song "Leave your head forward" is sung, performing the movements suggested by the song.	5 min.
Evaluation:	5 m:n
Congrel assessments are made on how the students newticineted in the	5 min.
General assessments are made on how the students participated in the activity, they will be rewarded with stamps on their class notebooks.	

Lesson Plan

Date: 7.11.2023	Grade level: secondary school, special school
Teacher: Popa Mariana Gina,	Subject: Communication
Centrul Școlar de Educație Incluzivă	Theme: Farm Animals
"Orizont" Oradea, Romania	

Competences:

General Competence: • Training and practicing the skills of correctly picking up the model in pronouncing words

• Training and practicing phonemic hearing

Operational objectives:

O1 – to correctly emit the onomatopoeia suitable for the animals presented;

O2 – to recognize and name the farm animals in the pictures;

O3 – to identify the animal that does not correspond to the presented group;

Methods and materials:	Sources:
M1 – Observation	
M2 – The conversation	https://wordwall.net/resource/19839691/animale-
M3 – The explanation	domestice
M4 – Exercise	
M5 – Independent work	
m1 – CD containing images of	
domestic animals and birds	
m2 – calculator	
m3 – worksheets	
m4 – graphic pencil	
m5 – colored pencils	
m6 – zoological atlas	
m7 – collection of riddles	

Time:

40 min.

Procedure:

1.Organizational moment for creating a relaxed, silent, confortable atmosphere

2. Capturing attention and announcing the theme:

The teacher tells some riddles related to farm animals. The teacher gives some onomatopoeias and the students have to recognize the corresponding animal.

3. Carrying out the activity:

A sequence of images with solitary farm animals is presented and the characteristic elements of each species are analyzed with the student:

- What are their names and where do they live?
- Why are they farm animals?
- What is their body made of?
- What is it covered with?
- What color does it have?
- What are their children called?
- What do they feed on?
- What benefits does man have from these animals?
- 4. Consolidation of knowledge:

The proposer describes an animal. Students will be asked to recognize the animal by the characteristics presented. To list the domestic animals in the grandparents' yard, or seen by him in the country.

The proposer opens the TARA program and presents some onomatopoeia. The students are seated with their backs so that they cannot see the image. Each answer will be checked and associated with the image and sound. Farm animals interactive activities:

https://wordwall.net/resource/19839691/animale-domestice

Evaluation: 5 min.

Sheet 1. To eliminate the animal that does not belong to the group of farm animals Sheet 2. To color the child's favorite animal

Explain why he likes this animal

To color the whole card, to choose the right color for each animal

Positive assessments are made on the way the child participates in the activity.

The works will be analyzed, following the stage of completion, the way of working (compliance with the work stages) and the general appearance of the works.

There will be an exhibition of all the students' work.

Order of the Minister of Education no. 3.702/2021 regarding the approval of school programs for special preschool, primary and secondary education (2021). School curriculum for the curricular area COMPLEX AND **INTEGRATED EDUCATIONAL THERAPY** Discipline COGNITIVE STIMULATION Special education Preparatory classes -4th Mild and moderate intellectual disabilities. Bucharest.

Procedure: 1. Organizational moment

I prepare the didactic materials. Order is ensured in the classroom.

2. Capturing attention

Some chess pieces (the white king and queen and the black king and queen) hid in the magical haversack. The students observe the pieces and name their colors. Once upon a time there was an old and wise king called the White King. He was the king of the sun, because he brought light to the earth, thus the day prevailed in the land eternally. The people were happy and loved their king, because they could constantly work in the fields, and gather the fruits of the gardens. (I show the children a transparent foil with a drawing of a chessboard with all white squares.) On a sunny day, when the crowd was celebrating at the Harvest Festival, on every second field it became night. Why did this happen? The Black King with his army attacked the White Country. Suddenly in the black lands people fell into an endless sleep, they rested and slept unceasingly. They soon used up their provisions, and became poor and hungry. In which country would you like to live?

Let's help the White and Black kings to understand each other, and to make order in their countries.

(Under the foil I place the drawing of a chessboard.)

3. Announcing the subject and formulating the objectives

Announce the subject and objectives of the lesson:

Today we will play with chess pieces, and by moving them on the chessboard, we learn what means top, bottom, front, back, middle, what is a row, what is a column and what is diagonal.

Movement games on the giant board: steps on horizontal lines, jumps on vertical lines (to the rhythm of tambourine sounds), walking on diagonal lines.

4. Recapitulation of knowledge

1. Color the chessboard in the Paint application!

2 ore

I show them the drawing of the chessboard where only the first row is shaded. Point to the chessboards with your finger or velcro tape (different colors) one row, one column.

Color a row and column in yourmaths notebook. Color row 5, column c.

2. Position the king/queen on the center of the board, on the left edge, on the right edge. Show where the middle of the page is with the squares, left edge,

right edge, middle-top, middle-bottom.

3.

- a) I position the king on the c4 field, and explain to them how to search for the name of the square.
- b) Where is the queen?

c) Color the d2 and e6 squares.

4.

- a) Take out the chess pieces from the magic haversack. I present the chess pieces. I ask the children to name them too, to touch them.
- b) I ask the children to name the chess pieces with their eyes closed by touch.
- c) Presentation of chess pieces in the initial position. I ask for their naming and then to place them in their original position by pattern and without pattern.

Presentation of the king's move.

Ex. Who gets to the middle of the board

Evaluation: You have been attentive and active, count how many stars you have collected!

In the meantime, the White and Black kings saw that you played so well, and they became friends, and decided that the White king would rule the land by day, and the Black king by night. People became very happy because they could work during the day and rest at night. That's why they sent you these chess pieces cards that you can cut out to play even further.

Date: 20 th of December 2023	Grade level: primary level, students with special educational needs	
Teacher: Sipoș Lăcrimioara, Centrul Școlar de Educație Incluzivă "Orizont" Oradea, Romania	Subject: Mathematics and environmental exploration Theme: Winter story – experiential theatre	

General skills:

The identification of some phenomena/ relationships/ regularities/ structures from the immediate environment

Specific skills:

1.1. Description of simple repetitive phenomena/processes/living things/structures from the immediate environment

Operational objectives:

Cognitive:

O1: To identify the qualities of objects: hard, soft, smooth, rough;

O2: To name the taste sensations: hot, cold;

O3: To recognize objects in the field corresponding perceptual field provided by the teacher-educator;

Psychomotor:

O4: To execute the movements indicated by imitation (bending, grip, pipe);

Affective:

O5: To experience on his own body tactile sensations: hard-soft, smooth - rough, hot and cold:

O6: To live emotions associated with events alongside Winter Fairy and Spring Fairy.

Materials:	Sources:
Decoration: forest divided into two (one part of winter and the other part of spring): branches, grass, small trees, leaves, flowers, butterflies, rocks, sledge, snowman, wadding, heater, Cd Player, Cd.	https://wordwall.net/resource/6 6628508
Relaxation Music: nature sounds, character costumes: Winter Fairy, Spring Fairy, Spring Fairy home decoration: table, chairs, ice, tea,	

Procedure:

The pupils prepare the decoration in order to pursue optimal activity.

Students are taken to the place of work.

The proposer of the activity, dressed in character dressed up as a Spring Fairy brings students to the place of work, in the midst of the scenery.

- "Do you recognize me? Do you know who I am?"
- "You guessed it! Therefore, I invite you today for a walk in the woods to remember how I am, to know my sister, but mostly to learn new things. Would you?

Spring Fairy begins to tell her a story.

" $-\,I$ am Fairy Spring and I miss to cheer the nature, but Winter Fairy , my little sister , does not let me come , she wants to stay with you .

Here comes the Fairy Winter:

" - Fairy Spring , you bring the sun with you, as I realize , but I am gone bring big ice needles, rain and snow, frost and fog! I am the master here!" (She throws with snowflakes over the children and she beats the floor with her foot) "

Fairy Spring, calm and gentle answers:,

" My dear sister, do not be upset! Do you forget that the time is passing by? You have worked and I have not stopped you! You covered everything in snow. Now, go home and get some rest!"

Spring Fairy invites children to see how beautiful her season is but Winter Fairy intervenes and invites them to see the beauty of its season.

Meanwhile, there are some conflicts between Winter Fairy and Spring Fairy; each invites the children to touch and to feel objects in their environment.

Fairies play with hot and cold air .(children are experimenting with the fairies, everything in sight, saying the object properties of the forests: hard, soft, rough, smooth, cold, hot).

After the children have explored both forests, Fairy Spring invites them at its home .

Spring Fairy reached its home and invites children to sit. She gives them hot tea because they spent all winter in the cold and they have to warm.

Meanwhile, Winter Fairy is knocking on the door. She gets inside and gives children ice, telling them that it is better than the tea offered by Spring Fairy. Children taste the things offered by the two fairies, saying the characteristics of ice and the tea (cold, hot).

Sipos Lacrimioara- Spring Fairy

Ficut Adriana-Winter Fairy

Evaluation: systematic observation, oral assessment, oral appreciation.

The teacher asks every student what they prefere the most and why.

Before the end of the activity, we will play something on wordwall https://wordwall.net/resource/66628508. The students will stop the wheal. The teacher will read the word. The students will repeat the word and they will make up sentences with it.

The digital material contains text slides, with words, connected to winter season.

Time:

40 min.

5 min.

Date: 10.11.2023	Grade level: from year 1 to year 12, special school
Teacher: Ingrid Tiirats, Tartu Herbert Masingu Kool, Estonia	Subject: Physical education

Objectives:

- Students can move safely in the city environment;
- Students can determine their position and direction in the familiar environment;
- Students use technological and/or personal tools to assess one's physical activity.

Materials:	Sources:
 Phones - least one smartphone per group 	Students can download the
<u>NaviCup</u> - homepage and app	application from appstore or google play.

Procedure: per lesson work	Time:
Teachers can create and modify the location of points on the map as well as the	
questions and tasks on the NaviCup homepage.	15-30 min
There are different types of points: automatic and photo points, as well as one	
word answer or free-response types of questions.	
Lesson	15 min
Students download the Navicup app to their device, introduction of the	
lesson and application, talking about different types of checkpoints and what to	
them.	
They pass checkpoints by really visiting the places on the map.	
The GPS on the student's own device is used to track their location.	15-90 min
Wi-Fi is needed at the beginning and end of the game.	
Evaluation:	
The results, answers, distance covered, leaderboard, etc. are visible in real time	
and at the end of the lesson and can be used to assess students' independent work.	

Date: 10.11.2023	Grade level: secondary classes, special school	
Teacher: Ingrid Tiirats, Tartu Herbert	Subject: Physical education	
Masingu Kool, Estonia	Social studies	

Objectives:

- Students understand the importance of exercise and nutrition for mental health.
- Students use activities that promote mental and physical balance to cope in everyday life.

Materials: Phones - least one smartphone per group. Presentation. Papers and pens for composing posters. Sources: Online presentation about food and mental health - example in canva. Feedback student engagement in Menti

Procedure: per lesson work	Time:
Teachers create a presentation about food and mental health, it should include possibility for students to give feedback and ask anonymous questions (menti).	15-30 min
Lesson Introduction of the lesson: give overview of the subject, start with a simple true or false game to engage students.	5 min
Teachers give more detailed descriptions about the topic. how and why food affects our brain, which food groups should be included in a healthy diet. talk about pre- and probiotics.	15 min
Students use Menti to suggest different foods that they think are good for the brain -live discussion with visualization.	5min
Within 10 minutes, students think of a school lunch menu (main course, dessert, drink) that supports their brain. They will present their ideas in posters (paper or canva).	20min
Evaluation: The results, answers, questions given in menti are visible in real time and can be discussed in the lesson. The posters can be presented in school cafeteria.	

Date: 12.11.2023	Grade level: the 3rd grade, special school
Teacher: Tuuli Tatomir, Tartu Herbert Masingu	Subject: Science
Kool, Estonia	Theme: Birds

Objectives:

By the end of this 45-minute class, students with special needs will learn:

- * feathers covering the body of birds; * they have wings to fly;
- * birds lay eggs with hard shells;
- * birds breathe with lungs.

Special Nr.1 Oradea, Romania	Theme: Thermal Processing of Raw Materials
	Time: 50 min (theoretical part)

Unit of learning outcomes: carrying out the basic processes

Learning outcomes

Units of competence

UC1: Performing team work

UC2: Supplying the workplace with raw materials

UC3: ensuring hygienic and sanitary conditions

Knowledge	Abilities	Attitudes
Description of thermal processing operations	processing operation while	processing of raw materials

Materials: M1 - documentation sheet	Sources: https://www.youtube.com/watch?v=-K_u8R5mAhU
M2 – visual materials - video	https://wordwall.net/ro/resource/30205194/educatie-tehnologica/prelucrarea-la-cald-a-alimentelor
M3 - digital materials created on various platforms	https://wordwall.net/ro/resource/30205194/educatie-
M4- laptop, smart tablets, smart display	tehnologica/prelucrarea-la-cald-a-alimentelor
1 0	

Procedure: 1. Organizational moment: A relaxed, pleasant atmosphere is created for the activity that will take place. 2. Capturing attention and announcing the theme: Attention capture is achieved by watching a video describing food processing https://www.youtube.com/watch?v=-Ku8R5mAhU and the strict of the activity that will take place. 45 min.

3. Carrying out the activity:

After watching, a series of content questions will be asked about what they understood from the video.

The theme and objectives of the activity will be announced. In order to identify and describe the types of thermal food processing students are encouraged to solve the following exercises:

https://wordwall.net/ro/resource/30205194/educatie-tehnologica/prelucrarea-la-cald-a-alimentelor

 $\underline{https://wordwall.net/ro/resource/30205194/educatie-tehnologica/prelucrarea-lacald-a-alimentelor}$

After each student solved the exercises, the conclusions are noted in the notebooks. Each type of thermal food processing is named and described.

4. Consolidation of knowledge:

For a better understanding of what was studied and for a proper differentiation of primary and thermal food processing, I invite the students to solve an exercise: https://wordwall.net/ro/resource/51758249

Evaluation and conclusion of the activity:

After announcing the winner, we will analyze the missed questions and resume the game!

Assessments will be made regarding the students' involvement in the activity. The theoretical part will be followed by a practical part.

5 min.

Date: 7.11.2023	Grade level: the 6th grade, special school
Teacher: Tocuț Maria Dorina, Centrul Școlar de Educație Incluzivă "Orizont" Oradea, Romania	Subject: Romanian Language and Literature Theme : "Puiul (The Chicken Quial)" by I. AL. Brătescu Voinești

Competences:

General Competence: Reception of written text of various types

Targeted specific competence: Identifying important information from literary and non-literary texts

Operational objectives:

Oc1- To read the first fragment expressively;

Oc2 – Divide the underlined words in the text into syllables correctly;

Oc3– To carry out concrete tasks of counting, addition, multiplication, appropriate to the studied text;

Oc4 – To correctly complete the lacunar text that represents the story of the studied fragment;

Oc5/Oa1-Get involved in Kahoot! activity;

Oc6-To find information about the wonderful quail and share it with others;

Materials:	Sources:
M1 - the text of the first fragment M2— To find information about the wonderful quail and share it with others	https://learningapps.org/watch?v=p8ye1i34c23
M3 -digital materials created on various platforms	https://learningapps.org/watch?v=p4anum2in23
M4- laptop, smart tablets, smartTV	https://create.kahoot.it/share/puiul-i-al-bratescu-voinesti/8d49b962-6e82-4d89-b3ce-746c52ffcca(
	voinesu/ou490902-0e62-4089-030e-7400321100a0

Procedure:

1.Organizational moment in which the pleasant atmosphere is created for the activity.

Time

2.Capturing attention and announcing the theme is being made by watching a beautifully illustrated film in which the entire reading is read expressively.https://www.youtube.com/watch?v=klk9qI403Zs

40 min.

3. Carrying out the activity:

After watching, a series of content questions will be asked about what they understood from the video.

The theme and objectives of the activity will be announced, stating that we will only work on the first fragment of the story for now.

Thus, students divided into two level groups receive the task of reading the expressive text. the monosyllabic words written in BOLD will be read by the students of level II.

After reading the entire passage, students are challenged to separate the underlined words in the text into syllables with the help of a digital application. https://learningapps.org/watch?v=p8ye1i34c23

After re-reading the first fragment, I invite the students to complete a laconic text with the correct words and together we check the correctness of our choice: https://learningapps.org/watch?v=p4anum2in23

4. Consolidation of knowledge:

For a better understanding of what was read, I invite the students to get involved in a game like Kahoot! https://create.kahoot.it/share/puiul-i-al-bratescu-voinesti/8d49b962-6e82-4d89-b3ce-746c52ffcca0

Evaluation and conclusion of the activity:

After announcing the winner, we will analyze the missed questions and resume the game! 5 min

Assessments will be made regarding the students' involvement in the activity and as a homework each student will have to look for information about these birds and share them with us next time.

Date: 14.11.2023	Grade level: secondary school, special school	
Teacher: Psysical therapist teacher	Subject: Exercises for correcting the scoliotic	
Ana-Maria Țicărat, Centrul Școlar	attitude	
de Educație Incluzivă "Orizont"		
Oradea, Romania		

Competences:

- -educating a correct attitude in order to prevent the occurrence of scoliosis;
- -increasing the joint mobility of the spine and the humeral scapula belt;
- -toning the trunk muscles;
- -the formation of the body's correct attitude reflex in static and dynamic activities

Materials:	Sources:
-laptop, video projector	https://www.youtube.com/watch?app=desktop&v=T8jI4RnHH
	<u>f0</u>
-mattress, Bobath ball	
	https://rocnee.eu/sites/default/files/2021/curriculum/Programe-
	scolare-invatamant-special_OME_3702_2021.pdf

Procedure:	
The stages of the lesson are:	Time:
1. Activity organization includes: greetings, attention grabbing exercises	
(checking the notions of left and right, body parts, spatial orientation exercises	3 min.
depending on your own body and the objects in the room)	
2. Preparing the body for effort: running exercises in place, walking exercises (on the tips, on the heels)	6 min.
3. The analytical influence of body segments: arm exercises (lifting, lowering,	
rotating exercises), trunk exercises, squats	
4. The fundamental stage:	9 min.
a) Initial standing position: arm exercises, trunk twists, lateral trunk tilts, windmills, sit-ups, lateral jumps on both legs, combined arm and leg exercises;	
b) From prone position – push-ups;	
c) From quadrupeds – hip extension;	20 min.
d) From ventral support – torso twists;	
e) From the stand passing through the jump in ventral support.	
5. Recovery of the body after exercise:	
a) The child in supine position – free breathing;	5 min.
b) The child lying on his back on the Bobath ball with his arms at his sides –	
rocking back and forth.	2 min.
6. Assessments and conclusions: assessments of kinetic activity and rewards.	
Evaluation:	
The evaluation of the students is done on the basis of evaluation sheets. The articular mobility of the spine and the muscle strength of some muscle groups are evaluated. This evaluation is done at the beginning of the school year (initial evaluation), in the middle of the school year (intermediate evaluation) and at the end of the school year (final evaluation).	
For each lesson, the number of repetitions of the following exercises is noted: sit-ups, trunk extension, push-ups, pelvis extension and squats.
